Supporting Product Sustainability

With our furniture being timber based we ensure that the wood we use comes from managed forests & other controlled sources. We became the first in the industry to be certified with a full Forest Stewardship Council® (FSC®) chain of custody.

Our ranges include decors with various levels of recycled content, including 100% recycled board and foils made from 70% recycled PET (used plastic bottles).

All of our plastic cabinet legs are made from 100% recycled plastic and our cabinet chipboard is manufactured from 66% recycled content.

We hold the accolade as Britain's first large furniture manufacturer to convert our painted products from solvent to an eco-friendly water-based option.

Sustainable Operations

Sustainability has always been a key focus of our operations. We have been awarded the ISO 14001:2015 standard for our Environmental Management systems across all four sites and we are proud to be the first in our industry to achieve this.

None of our manufacturing waste is sent to landfill and our literature is produced on carbon balanced paper.

Our delivery fleet is amongst the most fuel efficient on Britain's roads, plus we include Hybrid Electric Vehicles in our company car fleet.

Our manufacturing site is fueled by two 100% recirculation biomass fired boilers to optimise waste and minimise emissions.
